

Use Case “Place Rush Order”

1. Use case code

UC003

2. Brief Description

This use case describes the interaction between customers and AIMS software when the customer wishes to place rush order.

3. Actors

3.1 Customer

4. Preconditions

Customer has selected rush order delivery

5. Basic Flow of Events

1. The AIMS software checks whether the delivery address supports this service and if any products are eligible
2. Software requests additional rush order delivery information from the customer and provides other information
3. Customer enters and submit additional rush order delivery information (see Table 2)
4. Software recalculates the delivery fees and updates the corresponding invoice (see Table 3)

6. Alternative flows

Table 1-Alternative flows of events for UC Place order

No	Location	Condition	Action	Resume location
1.	At Step 2	If no products are eligible or the delivery address doesn't support rush order delivery	▪ The software prompts the customer to update the delivery information or delivery method	Use case ends

7. Input data

Table 2-Input data of additional rush order delivery information

No	Data fields	Description	Mandatory	Valid condition	Example
